60%	50%	50%	50%	40%	40%

Forecast for Thursday 21 Dec 2023

Weather: Daylight hours will bringing occasional showers and some bright or sunny intervals. The showers quite heavy and blustery in north and west, falling as snow initially above 700-800m but as it turns colder from the north, they will turn to snow down to 500m by afternoon. Limited fresh snowfalls but where they do occur over northern peaks, some blowing or drifting is likely in the extremely strong winds.

Chance of cloud-free hill tops above 800m: 60% by daylight hours.

Low Cloud and visibility: Cloud breaking and lifting to nearer 1000-1200m by daybreak, with good visibility away from showers, but near showers bases could fall to 750m with poor visibility outwith cloud as heavier snow showers pass through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Storm force winds with gusts over 100mph possible on exposed ridges and summits in morning, where any mobility will be almost impossible with a high risk of being blown off your feet. Note also the extremely low feels like temperatures.

Forecast for Friday 22 Dec 2023

Weather: Cloudy with occasional showers, snow falling above 500-600m, slowly rising. More persistent rain and snow will develop in the evening, turning to rain at all levels over most of the area, but remaining as snow across the Aberdeenshire hills down to 450m, the location of the boundary of the mild and cold air likely to be uncertain, but sharp.

Maximum wind: Though not as windy as Thursday, west to northwesterly winds will remain strong, around 35 gusts 50mph. Winds perhaps becoming more variable in direction in the evening.

Chance of cloud-free hill tops above 800m: 20-30%

Low Cloud and visibility: Extensive cloud at 700-900m with some lower patches. Occasionally moderate or poor visibility in any heavier rain, or where there is still snow falling.

Temperature:
Glens: Plus 4 Celsius, falling Plus 2 in the north while rising plus 6 in the Ochils
At 800m: Minus 3 Celsius, rising to zero in the afternoon and Plus 3 in the evening for much of the area, but staying below freezing in Aberdeenshire.
Freezing level: At first, 500m, but rising 800m in the south in the afternoon, and above summits in the the evening, but little change in the Aberdeenshire Hills.
